# **Revolutionary Packaging: LINEAPACK**

<u>Lineapack</u> is a leading company in the packaging sector, based in Italy. It is one of the most innovative companies providing value-adding solutions. The company offers a wide range of packaging solutions so as to satisfy the everevolving demands of the packaging sector. It provides innovative materials that ensure the optimum protection and preservation of the product while it gives support to your investment over the long haul.

#### **Products**

The company provides packaging materials for bakery, pasta, energy bars, dried fruits, nuts, etc.
Find the ideal packaging for an outstanding product!

## Packaging materials for bakery

# Packaging materials for pasta/rice

#### Packaging materials for energy bars

#### Innovative packaging

Lineapack uses packaging materials with customizable graphics and flexo prints in high definition. The <a href="Macquapack@">Acquapack@</a> patented technology ensures high impact graphics with water-based inks.

## **Packaging Revolution**

Reduce the plastic film with <u>Sbucciapack</u>®, a patent for eco-friendly packaging.

The idea is the separation between the paper layer on the outer side and the plastic film on the inner side, which are joined firmly with ecological glues based on water.

The separation permits the differentiated waste collection.

Throw away the recyclable waste paper with paper and the plastic with plastic!

# Benefits of the customer, working with LINEAPACK/MORENOS

- ✓ Performance excellence
- ✓ Better optical result of the product
